

Step 1: The "Token Forge" (Preparation)

1. **Open your site and go to Licensing Hub.**
2. **Switch to Founder Mesh (Control).**
3. **Type the Client Name (e.g., Nexus Fintech) and click "Assign Logic Shard".**
4. **A code is created (e.g., VX-2025-NEX-4821). It is currently LOCKED in the database.**
5. **Copy this code.**

Step 2: The "Fiscal Handshake" (Invoicing)

1. **Go to the Invoice Portal.**
2. **Configuration: In the black box on the right, ensure your current Savings details are saved and "Committed to Mesh."**
3. **Client Info: Enter the client's name and address.**
4. **License Setup: Select the Tier (Sentinel/Fortress/Citadel) and the Duration (e.g., 3 Months).**
5. **Click "Preview & Sign".**
6. **Click "Save as Forensic PDF".**
7. **Send the PDF and the Locked License Code to the client via email/WhatsApp.**

Step 3: The "Settlement Audit" (Payment)

1. **The client sees your bank details on the PDF and transfers the money.**
2. **You receive the bank update on your phone.**
3. **The client enters their UTR/Transaction ID into their portal (or sends it to you).**

Step 4: The "Activation Protocol" (Delivery)

1. **Once you see the money in your HDFC/Savings account, go back to the Licensing Hub (Founder View).**
2. **Find the client in the registry.**
3. **Click the "Confirm Payment & Activate" button.**
4. **The Result: The backend updates Supabase. The client's status changes to Active and they receive 100 Shards (credits).**

5. **The client can now click "Reveal Token" on their dashboard and start scanning candidates.**
